**Subject: OIL Recommendation LS2 and LS3 Engines**

The oil recommendation for two of our current production LS series engines, the LS2 and LS3, has been inadvertently listed as conventional 15W40 Pennzoil Marine oil. The recommended oil for those engines, according to General Motors, is 5W30 Mobil 1 Full Synthetic oil. These engines leave Indmar filled with 5W30 Mobil 1 and that is the oil that should be used in these engines at the normal 50 hour oil change intervals. The oil capacity of these engines is approximately 6 quarts (5.7 Liters). If you have serviced the engine with 15W40, we recommend that on the next oil change it be switched back to the correct oil.

Additionally, the Pennzoil PZ-3 filter that we have been using on all of our 5.7L engines as well as all engines with remote oil filters is no longer available. The replacement filter is the Pennzoil PZ-52. The Indmar part number for the filter, S501001, has not changed. If you order P/N S501001 you will now get a PZ-52 filter which is slightly shorter than the PZ-3 but a direct replacement.
